

Lubes Flare System Revamping

- ▶ Client: Motor Oil Hellas (MOH), Corinth Refineries S.A., Greece
- ▶ Detailed Engineering design and Procurement assistance Services
- ▶ September 2015 – October 2016

Project is for revamping existing MOH Lubes Complex Flare System, in order to improve its reliability and operability, and is based on a respective ATPL process study submitted in May 2015. Main modifications include the replacement of existing safety valves with either new ones or HIPPS (high integrity pressure protection systems), along with respective piping and civil works.
